About Me

Software Engineer with 1.5+ years of experience building enterprise supply chain and dealer management solutions using Salesforce Apex, Lightning Web Components, and asynchronous processing. Experienced in designing high-volume reporting pipelines, Batch Apex jobs, REST integrations, and data-intensive business workflows. Additionally experienced in Flutter application development and backend systems.

Technical Skills

Languages: Apex, Java, Dart, JavaScript, C#, SQL, Python
Frontend: Flutter, Lightning Web Components, Aura, React
Backend: Apex, Node.js, REST APIs, .NET Worker Services
Salesforce: Batch Apex, Queueable Apex, Schedulable Apex, SOQL, SOSL, Visualforce
Databases: MySQL, PostgreSQL
Tools/Technologies: Git, Docker, VS Code, Eclipse, Android Studio, Postman
Frameworks: Flutter, Firebase, Node.js, React

Experience

Dealmatrix

January 2025 – Present

Software Engineer

S.A.B. Nagar

- Developed enterprise Salesforce solutions for Dealer Management and Supply Chain Management platforms using Apex, LWC, SOQL, and asynchronous processing.
- Designed Batch Apex and scheduled processing pipelines for high-volume inventory, stock ledger, invoice, and dealer reporting workflows.
- Built asynchronous CSV export architecture using Batch Apex and ContentVersion to process large datasets while mitigating Salesforce governor and synchronous reporting limits.
- Developed configurable approval and temporary override workflows with multi-level approval, scheduled field restoration, and role-based access controls.
- Optimized Apex and SOQL logic to resolve query, DML-row, and large-data processing bottlenecks in production workflows.
- Built and maintained Lightning Web Components for inventory, shipment, GRN, invoice, and stock reporting interfaces.
- Contributed to external accounting and ERP integrations using Salesforce REST endpoints and .NET background worker services.

RowX

August 2024 – December 2024

Full-Stack Flutter Developer

Chandigarh

- Developed cross-platform mobile applications using Flutter and Dart for client-facing production projects
- Integrated Flutter applications with REST APIs and backend services to support dynamic application workflows.
- Built reusable UI components and responsive interfaces while maintaining modular application architecture.
- Collaborated with backend and product teams to debug, test, and deliver application features.

University Institute of Engineering and Technology

July 2023 – Oct 2024

Project Intern

Chandigarh

- Led a team for Graduation Project.
- Collected and Annotated a dataset of 15000 images.
- Analyzed the collected data using Object Instance Segmentation frameworks.

Projects

Tripund Store | Dart, Flutter, Node.js, Git-Version Control, Figma, VS Code

August 2024 - Present

- Leading the mobile application side of Tripund Store project and collaborated closely with the client at RowX.
- Developing a Flutter application with an emphasis on a polished user interface.
- Responsible for integrating the frontend with the backend and ensuring all bugs are identified and resolved efficiently.

Lameness Detection in Pullets and Cockerels

Data Collection, Data Research, Python, Machine Learning, Computer Vision

July 2023 - Oct 2024

- Led a four-member research team developing a computer vision system for detecting lameness in poultry.
- Built and annotated a dataset containing 15,000+ images of pullets and cockerels.
- Evaluated instance segmentation frameworks for identifying and analyzing poultry movement characteristics.
- Designed the data collection, preprocessing, and model evaluation workflow for the project.

Education

UIET, Panjab University

B.E. in I.T. - 8.72 CGPA

Nov. 2021 – May 2025

Chandigarh, Chandigarh
